# What you should know about prescription opioids for short-term pain

---

## Using an opioid in the short term:

- increases your risk of falls and fracture
- may cause confusion
- may cause side effects (constipation, tiredness, nausea, feeling itchy)

If an opioid is needed, it should only be used for a short time.

Stop taking opioids as soon as possible.

Discard any unused tablets or pills:

- Flush down the toilet.
- Throw in the trash after mixing pills with used coffee grounds or kitty litter.
- Bring to a collection site such as a secure dropbox or take-back event.

For take-back locations, visit: [apps.ddap.pa.gov/gethelpnow/pilldrop.aspx](https://apps.ddap.pa.gov/gethelpnow/pilldrop.aspx).
